Projects

E-Commerce Website
Project Link: https://online-store-8eu9.onrender.com
- Our E-Commerce platform is designed to provide a seamless shopping experience, offering a wide range of products with user-friendly navigation and intuitive features.
- Customers can explore products through dynamic search, advanced filtering options, and personalized recommendations based on their preferences.

Technologies used: JSX, Bootstrap, Hooks, Redux, Sagas, Node.js, Express , MongoDB, Mongoose, Razorpay etc.

Car Rental Service Website
- The Car Rental Service application is a full-stack web-based platform designed to simplify the car rental process for both customers and administrators.
- Built using Express.js for the backend, HBS (Handlebars) for templating, and MongoDB as the database, the platform is fast, scalable, and user-friendly.
- The project focuses on providing seamless car booking functionality, managing rental operations efficiently, and ensuring a secure and intuitive experience for users.
